The Problem

100,000+ Nepali Australians lack a single dedicated English-language platform that bridges news from Nepal and Australia in one place.

Our Solution

A full-stack bilingual news platform with live data, AI assistant, and community tools — built with Laravel 13 and deployed on Render.com.

Target Audience

Nepali diaspora in Sydney, Melbourne, Brisbane, Perth & Adelaide

Deployment Steps

1. `git push` to GitHub main branch

2. Render.com detects new commit automatically

3. Docker image built from Dockerfile (PHP 8.2 + Apache)

4. `composer install` runs – all Laravel dependencies installed

5. `start.sh` executes: writes `.env`, runs migrations, seeds DB, caches config

6. Apache starts – site live at <https://nepal-news-australia-n59b.onrender.com>
